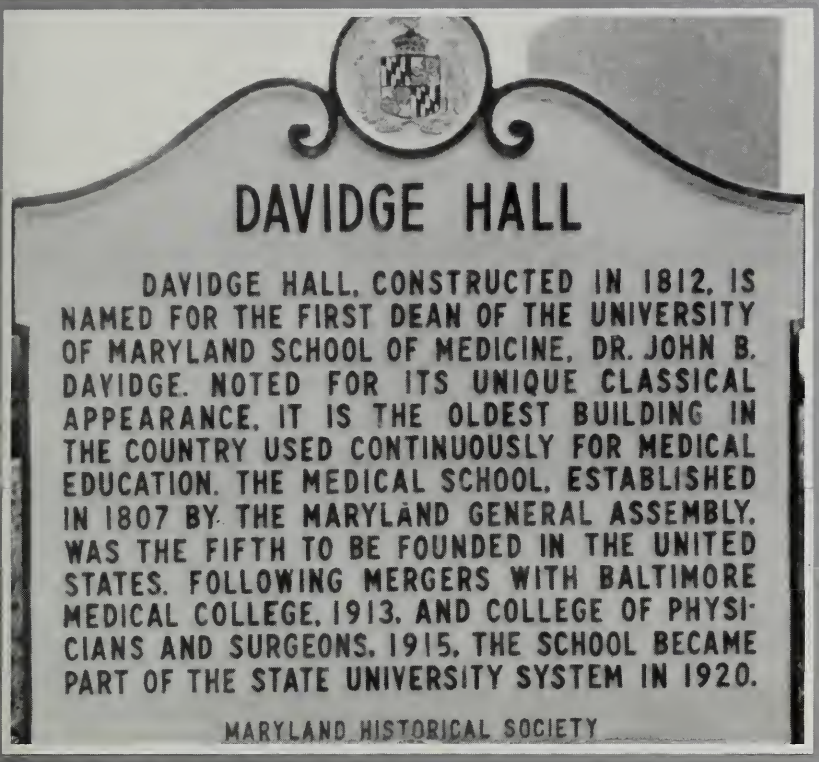
This book is dedicated to Alex Dromerick. May we live our lives as courageously and victoriously as he is living his.



Stop this day and night with me and
you shall possess the origin of all poems,
You shall possess the good of the earth
and sun,
You shall no longer take things at second or
third hand,
Nor look through the eyes of the dead, nor
feed on the spectres in books,
You shall not look through my eyes either,
nor take things from me,
You shall listen to all sides and filter
them from yourself.

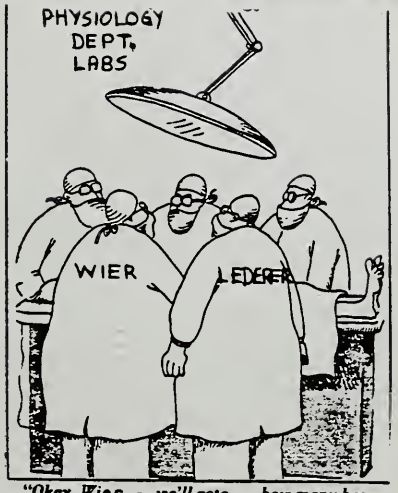
HUMAN DIMENSIONS IN MEDICAL EDUCATION

IN THE BEGINNING . . .



"Okay, Wier — we'll vote . . . how many here say the heart has four chambers?"

MIDDLE SEMESTER . . .

ROSENBERG'S NEUROANATOMY: Everything connects with everything and is of unknown importance but is a guide to the location of tumors and vascular accidents. The average clinician doesn't need to know and the neurologist never knows and the patient senses the deficit but often goes on to live a normal life although totally impaired. There is little hope, but a lot of interesting CAT scans.

SOPHOMORE YEAR

Are we having fun yet?

Dr. Applefeld demonstrates signs and symptoms of vitamin C-brewer's yeast-alfalfa sprout intoxication syndrome.

Happy-go-lucky Howard Schultz in one of his zanier moments.

Margaret Burke is smug about refusing note service, having majored in five foreign languages as an undergrad.

Charlie Hames tries to grasp the Zen of T-scores.

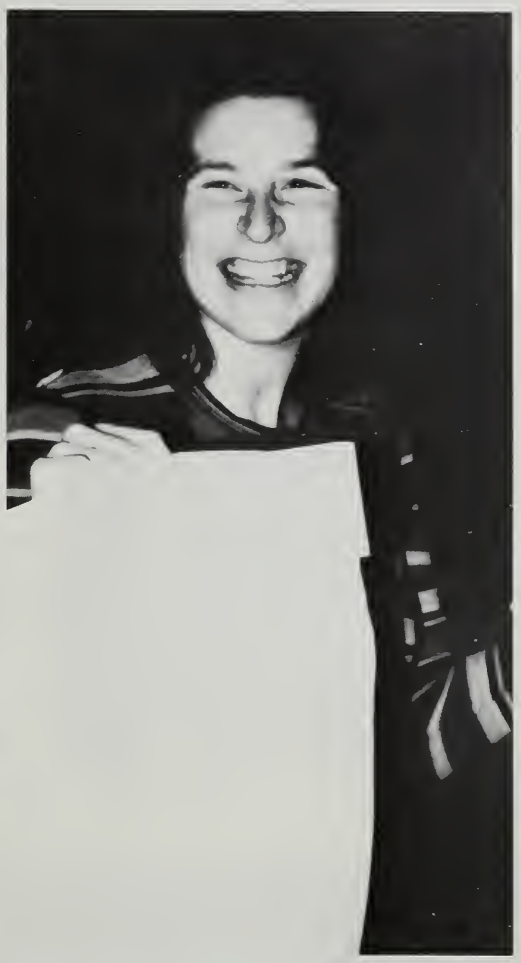
Don Lewis trying to appear as Dr. Applefeld.

Rich Allen trying to appear as Don Lewis.

Francisco King searches Kim Chandler's nasopharynx for elusive vomer.

"It's about time we got those micro notes!"

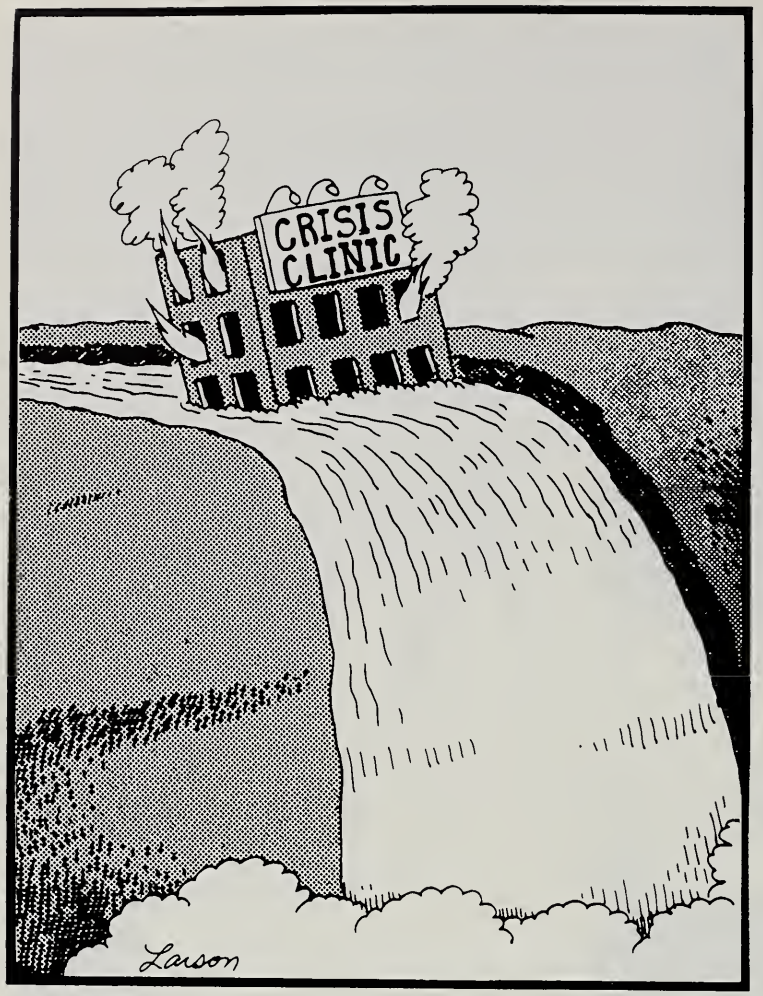
After hitting her first target, Christine Helsinki aims carefully for Sharon Henry's other eye.

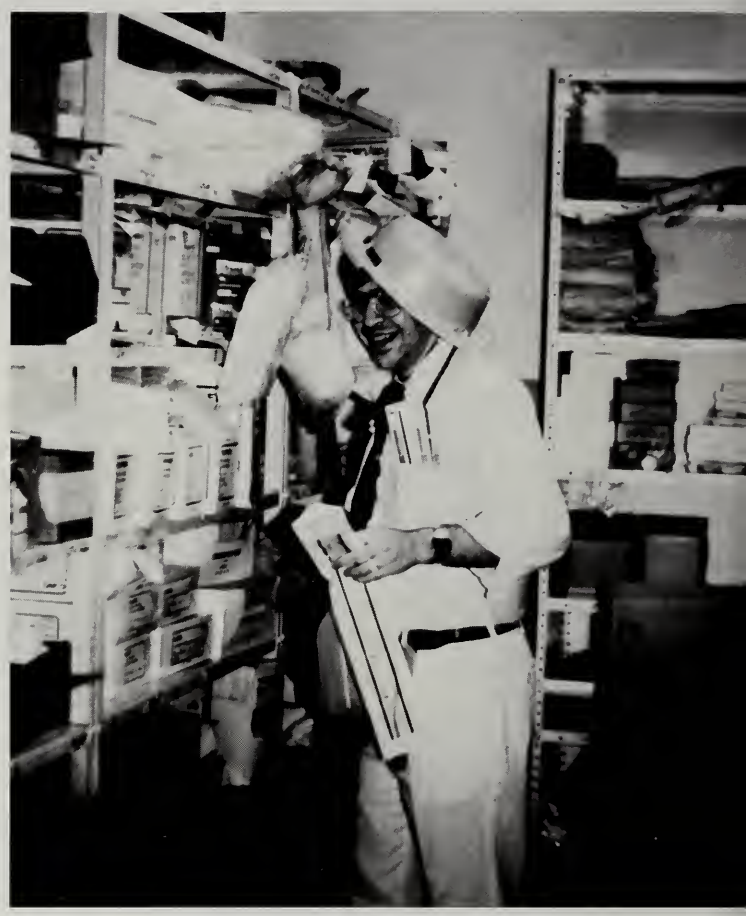


Hari proudly displays her clean, new, pre-gomer-exposure whites.

"It was good for me, Greg; was it good for you?"

JUNIOR YEAR:





Louie entered medicine for the glamour.

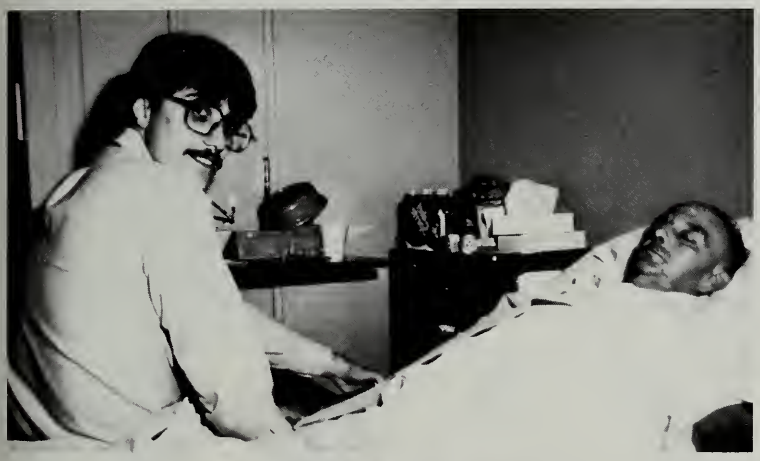
Four o'clock at the Spa.

Those liver dinners make being on call worthwhile for Diane.

THE VA, DR. STONE, AND OTHER HORRORS

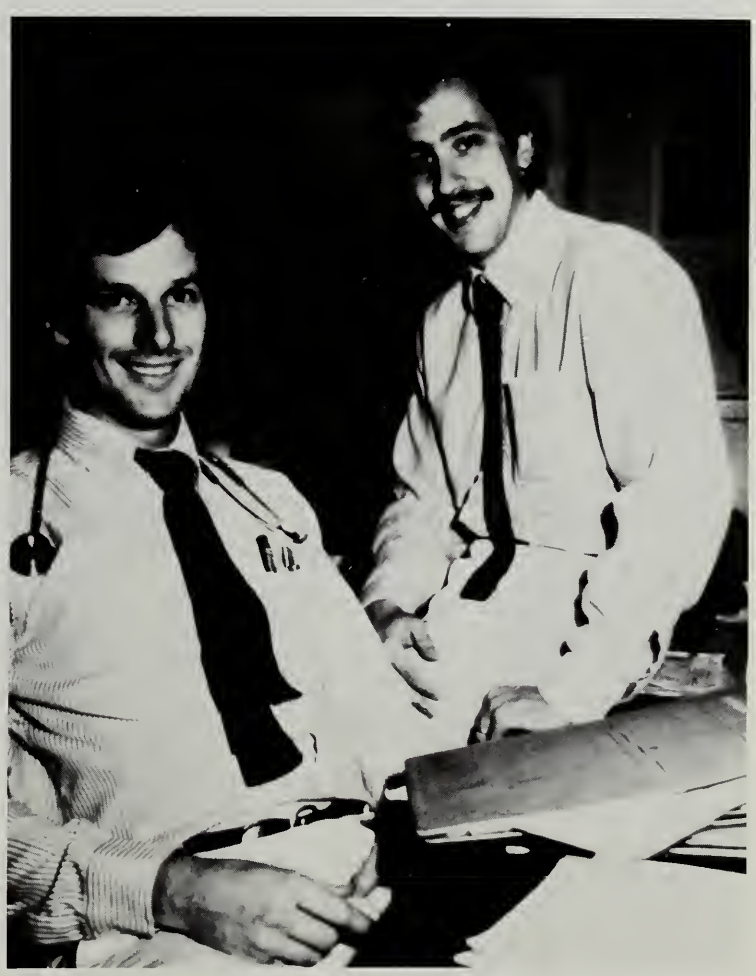
Cathy, Mike, and Chris greet yet another admission.

Lazlo and Sara take a break from catching babies.

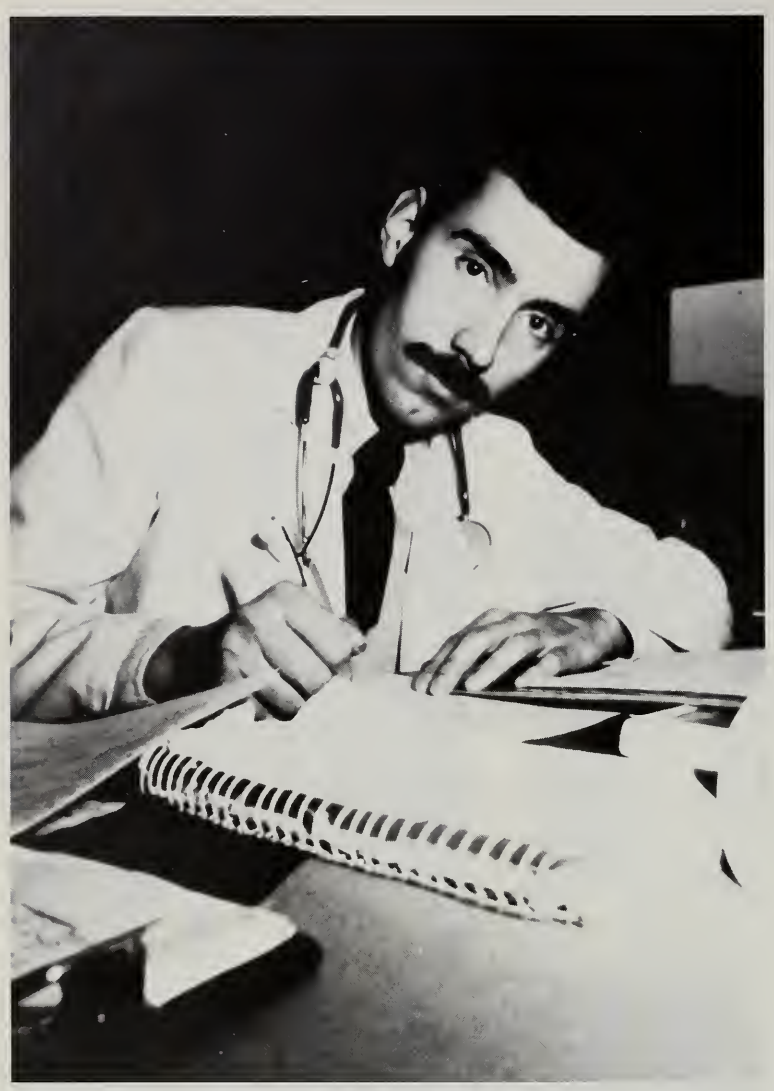


Paul interviews Homer Gomer.

The McCormick technique for decreasing patient load.



"The V.A. May we help you?"



"There are no good cases at 3 a.m."

"Hoyas 54, Saint John's 40!"

"You want *who* to put an I.V. in the yellow man?"

"The cardiac output, Dr. Stone? 5.40, I presume."

An afternoon delight from the Cafe de Loch Raven.

Mike considers writing an order.

Louie, post-oral exam with Dr. Iber.

After finally obtaining all proper signatures, co-signatures, blood samples, slips and I.D. bracelets, Mark Sauer returns for the fourth time to the VA blood bank to get one unit of packed RBC's. Mark is shortly thereafter told, however, that it is after 3 p.m. and the blood bank is no longer accepting transfusion requests.

OKAY... DIG DEEP, BOY...DEEP!
UH... YOU DON'T HAVE ANYTHING I COULD CATCH, DO YA?
NOT DEEP ENOUGH?

AH! A FARMER! A MAN OF THE EARTH! GREETINGS... I'M SENATOR BEDFELLOW.
AH... MY HEART BLEEDS FOR YOU GOOD FOLKS... BEEN HARD TIMES, HASN'T IT?
NOPE. DOIN' DANDY.
WELL GOOD! GOOD! THIS IS A FINE BATCH OF CORN YOU HAVE!

   c. There was no sophomore lecture hall.
   d. None of the above.

2. How many questions did Vicky Mossman ask freshman year?
   a. none
   b. one or two
   c. 6.02×10^{23}
   d. TNTC

3. Whose note set took the longest to read?
   a. Hari Sachs (22 pages)
   b. Charlie Hames (32 pages)
   c. Susan Barrows (400 pages)
   d. Abbas Sinas (4 pages, but required translation)

4. Who needed a cold shower after completing Norm Bradford's lecture on orgasm?
   a. Chris Baldwin
   b. Cathy Smoot
   c. Fred Gessner
   d. All of the above

B. K-TYPE QUESTIONS.

1. Which of the following symptoms are part of the Sean Hunt Syndrome, namesake of the Hunt Superior Position (HSP)?
   1. Prevalence highest in female nursing students.
   2. Complete bowel shutdown.
   3. Intoxication and dim lights are a girl's best friend.
   4. Decreased libido when near dentists.

The Gomer Laws of Physics

compiled by Gonzo, et al., 1981-1983

I. Gomer Mechanics

1. A gomer at rest tends to stay at rest unless acted upon by an outside force.
2. For every gomer there is an equal and opposite physician.
3. The average energy of a collection of gomers is zero.

II. Gomer Thermodynamics

1. A gomer in equilibrium with its surroundings must be in a VA hospital or a nursing home.
2. Gomers may neither be created nor destroyed. When a gomer dies or is discharged, another will immediately take its place.
3. A gomer, by definition, is a maximum entropy state. No useful work can be extracted from a gomer under any circumstances.
4. A gomer can be brought close to death, but no real physical processes can ever actually cause death to occur.

III. Gomer Quantum Mechanics

1. Gomers interact with the external world by the emission of particles from one of several orifices.
2. When a gomer makes a transition from one energy level to another, it emits a guaiac positive particle.
3. Pauli exclusion principle of gomers: No two gomers of the same sex may occupy the same bed in a nursing home or VA.
4. The force between a physician and a gomer is repulsive.
5. A gomer who does not have the energy to get to the hospital may still appear in the hospital.
6. The uncertainty in age times the uncertainty in BUN is greater than or equal to the number of necrotic skin lesions.

Choosing Your Residency

Answer the following questions truthfully. Any department which receives a high percentage of YES answers merits your serious consideration.

Pediatrics
1. Can you slide a #26 IV needle into a #28 vein?
2. Do you consider a faceful of urine to be playful fun?
3. Have you been vaccinated against human bites?
4. Does your nose twitch in anticipation of the warm welcome awaiting you in baby's diapers?

Medicine
1. Do hypochondriacal, obese females who gain weight and whine turn you on?
2. Do you know the generic names of eight different laxatives?
3. Can you feel a liver edge through 18 inches of fat?
4. Do you have recurrent nightmares having to do with knives, bright overhead lights, and zombies in green robes and white masks?
5. Do you have total recall, including page numbers, of all articles appearing in *The New England Journal of Medicine* since 1951?
6. Do you know anyone in Boston on a first name basis?

Dermatology
1. Do you speak Latin?
2. Does the thought of practicing medicine without needing hospital privileges appeal to you?
3. Do you subscribe to *Runner's World* and/or *World Tennis*?
4. Does having to carry a stethoscope in your clinic coat annoy you?
5. Do the numbers on clinical laboratory reports confuse you?

Obstetrics/Gynecology
1. Do you know 500 catchy one-liners to use when you see your patients at social gatherings?
2. Could you properly time your patient's birth control pills so that the curse never falls on a weekend?
3. Would your conscience have permitted you to induce labor at 8 months in order to go to the games in Los Angeles?
4. Are your fingers or toes 14 inches long?

Radiology
1. Does bright light hurt your eyes?
2. Have you never quite figured out why you went to medical school?
3. Could you interpret ER skull films over the phone?
4. Do you play golf?
5. Can you awaken in the morning sometime before noon?
6. Do you have a six month supply of Preparation-H?

Psychiatry
1. Did your mother want you to be a doctor?
2. Do you talk to yourself?
3. Could you grow a beard?
4. Do you have recurrent dreams of a long, straight, hard road leading to a deep, dark, moist, warm cave and finding an erupting volcano?
5. Can you disappear after 4:00 p.m.?
6. Were you toilet trained by age 11?
7. Do you look as if you might be on some sort of hallucinogen?

Surgery
1. Do you have a skin-tight blue suit with a red cape and a big red "S" on your chest?
2. Do you suspect that the underlying cause of most nosebleeds is a ruptured appendix?
3. Do you have a built-in scowl and the cheerful disposition of a urinal?
4. Do you stir your coffee with a knife?
5. Do people without scars offend you?
6. Could you go for eight years without sleep?
7. Were you angry when you discovered that someone else had already walked on water?
8. Do you look forward to Saturday night knifings?
9. Do you believe that irregularity warrants an emergency colostomy?

Pathology
1. Does a pickled aorta strike you as a tasty hors d'oeuvre?
2. Are you 300 pounds overweight?
3. Is your idea of fun spending Saturday night looking at your friend's kidney slides?
4. Do warm bodies nauseate you?
5. Does knowing the right answer at the CPC provide you with some sort of erotic release?

Pat Patterson is the first to know.

Jeff Etherton collects his evelope along with $170 as he narrowly defeats Donna Fisher for the jackpot.

THE OATH OF HIPPOCRATES

"I do solemnly swear, by that which I hold most sacred, that I will be loyal to the profession of medicine and just and generous to its members. That I will lead my life and practice my art in uprightness and honor. That into whatsoever house I shall enter it shall be for the good of the sick. To the upmost of my power I hold myself aloof from wrong, from corruption, from the tempting of others to vice. That I will exercise my art solely for the cure of my patients, and will give no drug, perform no operation, for a criminal purpose, even if solicited, far less suggest it. That whatsoever I shall see or hear, I will keep inviolably secret. These things I do promise and in proportion as I am faithful to this, my oath, may happiness and good repute be ever mine, the opposite if I shall be forsworn."

Special thanks to Mike Platto. Without his countless hours of help, this yearbook would be a pile of pictures on my apartment floor.
